RESEARCHThe following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (N = 1,000). The independent variables are "Age of the head of household" and "Gender of the head of household". The dependent variable is "Number of children in the household". The regression equation is: 
$$\text{Number of children in the household} = 0.001 \times \text{Age of the head of household} + 0.002 \times \text{Gender of the head of household} + 0.003 \times \text{Constant}$$
 The regression coefficients are:

Figure 1 displays a sequence of 16 grayscale images arranged in a 4x4 grid, illustrating the degradation of a handwritten digit '4' under increasing levels of salt-and-pepper noise. The images are labeled with numbers 1 through 16 in the bottom right corner of each image. The sequence shows the digit becoming increasingly obscured by noise, with the bottom row showing more significant distortion and blurring compared to the top row.

Prestige for Nature  
Introducing the new Zegna

## Sartorial style by Ermenegildo Zegna

Established in 1901 by the eponymous founder in the heart of Italy's fashion capital, Ermenegildo Zegna began as a small suit shop specialising in its high quality woolen suits. Within four generations, the family-owned company has grown and expanded to become the most important source of sartorial style for men around the globe. Inspired by its roots in Italy, Zegna's history, and distinctive style, the Ermenegildo Zegna brand has developed into premium collections of SUITS, JACQUARDS, TROUSERS, and ACCESSORIES for men.

With the newly opened Ermenegildo Zegna stores at Lotuscourt 1 and Lotuscourt 2, Lotuscourt Mall, Lotus is the Philippine partner of Ermenegildo Zegna.
